

# Cloud Compliance & Security Assessment

**Vandis' offering is ideal for companies looking to ensure they are properly securing their workloads and are meeting compliance standards within their cloud environments.**

## What is the Vandis Cloud Compliance & Security Assessment?

Vandis will run a snapshot against your current cloud compliance background to provide our team with an overview of your organization's current security posture. After analysis, our engineers can identify any applicable compliance violations or security issues and propose steps for remediation.

### Compatible with All Cloud Environments

- Amazon Web Services
- Microsoft Azure
- Google Cloud Platform

**Ensure information security standards are met in the cloud**

### Perform Compliance Gap Analysis

- PCI
- HIPAA
- NIST
- SOX

**Ensure compliance with industry standards and regulations**

### Why customers use the Cloud Assessment

- Identify potential security gaps before an incident occurs
- Meet cloud best practices with expert guidance
- Ensure compliance with standards such as HIPAA, NIST, and GDPR before any violations occur
- Receive assessment results within one week

### Vandis Expert Engineer Support

- Review results with an experienced Vandis engineer
- Identify violations or issues
- Propose steps for remediation that align with cloud and security best-practices

**Expert security guidance**

"The Cloud Compliance and Security Assessment is an effective tool for companies to better secure their workloads in public and private cloud environments, maintain essential compliance standards, and expose hidden security gaps you might not otherwise find until it's too late."

- Ryan Young, CTO, Vandis

# How A Cloud Compliance & Security Assessment Benefits Your Business

The Cloud Assessment allows Vandis' engineering team to get a complete view of your existing cloud environment and check it against best practices and regulatory guidelines. This provides a gap audit that allows our team to quickly provide a security solution roadmap and/or design validation.

This assessment fits any organization looking for a quick cloud posture assessment, compliance gap analysis, and/or POC into what auto-remediation could help with.

## Cloud Compliance & Security Assessment

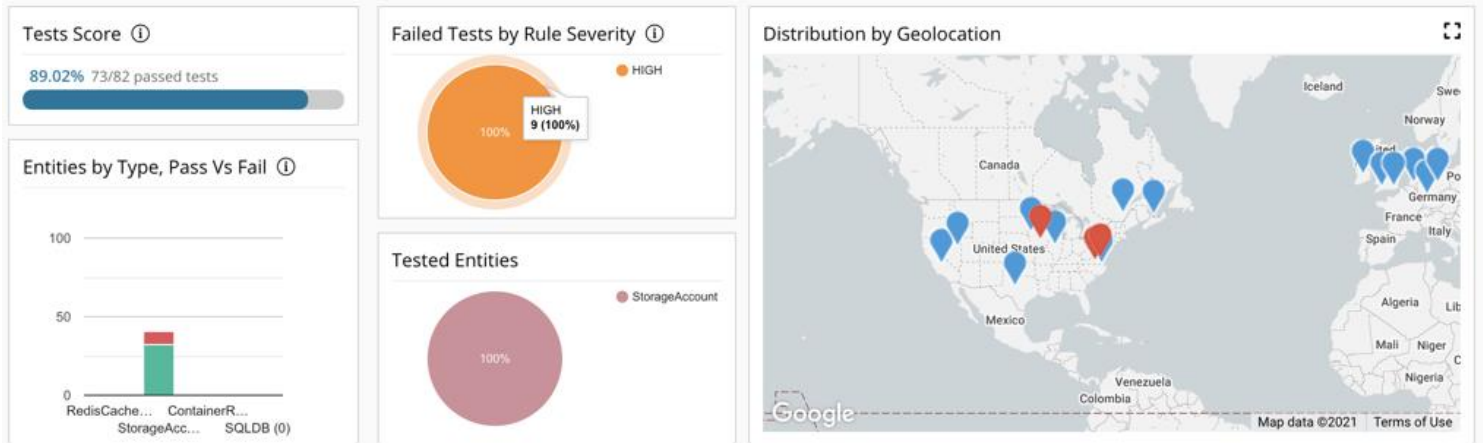

### Our promise to you

That we can thoroughly assess your cloud environment and offer a customized optimization and security improvement plan.
